What a great entry looks like

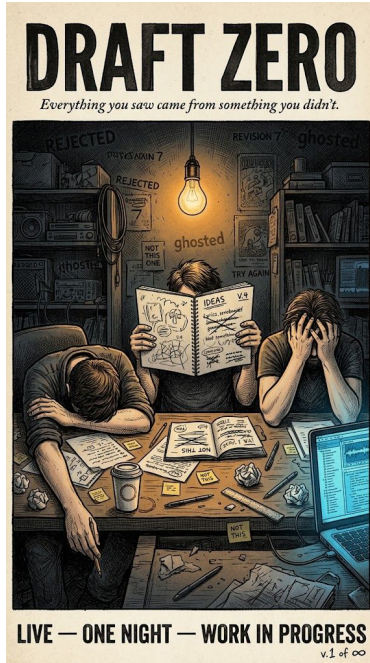

Anthem Name: The Inches Between

- **Band name :** Ankaha
- **Tagline :** Khamoshi bhi ek zubaan hoti hai.
- **Genre:** Alternative Rock / Post-Hardcore
- **Description:** "The Inches Between" is a tender, quietly devastating track about the heavy emotional weight of things left unsaid. It lives entirely in the space between feeling something completely and never speaking it aloud, capturing the realization that the silence between two people is often roaring with unspoken truths.

What a great entry looks like

Anthem Name: Silent Casualty

- **Band name :** Draft Zero
- **Tagline :** Everything you saw came from something you didn't
- **Genre:** Alternative Rock / Post-Hardcore
- **Description:** Draft Zero is a gritty, atmospheric rock anthem about the grueling, unglamorous side of the creative process. Built on the classic "loud-quiet-loud" dynamic, it contrasts moody, quiet verses with explosive, heavily distorted choruses to mirror the frustration, exhaustion, and stubborn perseverance of a late-night creative block. It's the soundtrack to burning the midnight oil when you're ready to quit, but refuse to let the empty room win
